***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to a liquid crystal display with a particular fixing device to insert a digitizer, classified in class 349, subclass 60.
- II. Claims 14-21, drawn to a liquid crystal display with a particular fixing device and a fixing board to secure the printed circuit board as classified in class 349, subclass 150.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the liquid crystal display in group I does not require one or more fixing boards having an end portion coupled to bottom surface of the top case and being bent to be parallel to the support main so as to secure the printed circuit board. As shown by claim 1, the combination does not require the subcombination as claimed for patentability. The subcombination has separate utility such a liquid crystal display with a particular support for a printed circuit board.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

A telephone call was made to Robert Goodell (Reg. 41040) on March 31, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

### ***Conclusion***

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
